

Corner Refrigeration ("CR") Unit Improvements

1. Standard Leer cabinet lock form construction for tighter, stronger seams
2. More uniform walls
3. White clad metal on both the top and back of the cabinet
4. Tighter, stronger compressor cover assembly with alignment brackets
5. Standard Leer L-280 unit cooler assembly
6. Capillary tube refrigeration system
7. Triple pane glass door
8. Standard Leer condensate drain pan assembly
9. Completed merchandiser can be Underwriters Laboratory approved
10. Standard Leer high impact breaker strips around door openings
11. Easily removable defrost timer for faster servicing and access to compressor
12. Service valves located for better access
13. All walls are 2½" thick urethane foam insulation
14. Skid rails redesigned with ramped ends
15. Kick plate and corner guard option
